Kamco™ Division

EZ-ROLL™ LINE SETS

EZ-ROLL™ factory made Line Sets by Kamco™ are manufactured to make field installations easier.

EZ Advantages

Eliminating on-site sleeving, EZ-Roll™ Line Sets reduce installation time and provides a tight insulation fit to improve R value and system efficiency.

EZ-Roll™ Line Set features include a large coil ID combined with a soft temper, to increase ductility and provide a uniquely EZ unrolling and installation experience.

Available in a wide variety of sizes, lengths and insulation thicknesses, our EZ-Roll™ Line Sets are available with quick delivery times to service your installation requirements.

Insulation Specifications

- ASTM C-534
- UL94/FMRC tested and certified
- NFPA 255/90A/90B
- 25/50 rated to ASTM E-84 (flame and smoke)

EZ-Roll™ Line Sets for Air Conditioning and Refrigeration Applications

Earning a reputation for industry-leading quality and galvanizing the market with quick service times, the Kamco™ Products division of Great Lakes Copper, Inc. proudly presents our brand of EZ-Roll™ line sets for air conditioning and refrigeration applications. Starting with the highest quality materials, EZ-Roll™ Line Sets install with ease and provide our customers with the advantages they require.

EZ-Roll™ Line Sets?

EZ-Roll™ line sets are available in a wide variety of sizes, lengths and insulation thicknesses to service residential, commercial, industrial or green-compliant installations.

Our copper tubing is manufactured to meet the demands of residential or commercial applications and is suitable for today's brand new, replacement or elevated pressure installations.

Utilizing the heat-conductive properties of copper tube with the intrinsic R value of Elastomeric foam insulation, Kamco™ factory-made line sets provide a one-step solution for air conditioning applications. Factory assembled line set eliminates the need for on-site sleeving and puts the savings in labor back into your pocket. Ready to install right out of the box, EZ-Roll™ line sets removes the risk of tearing the insulation while sleeving on-site.

	SIZE	INSULATION THICKNESS	LENGTHS (FEET)
SUCTION LINE	5/8" - 1-1/8"	3/8", 1/2"	15', 20', 25', 30', 35', 40', 45', 50'
<small>(90 degree bend or plain ends available)</small>			
	SIZE	INSULATION THICKNESS	LENGTHS (FEET)
LIQUID LINE	3/8"	N/A	15', 20', 25', 30', 35', 40', 45', 50'

* 3/4" and 1" insulation available upon request.

EZ interlocking tabs provide maximum stability.

Stackable up to 3 pallets high reduces warehouse foot print.

Double-stackable for transport and fully secured with our EZ interlocking tabs in racks.

'Pizza-style' cartons with die-cut handles offers ease of transport on the job site, and eliminates master carton waste.
